Appreciation Letter

To Whom It May Concern;

On behalf of Zuma Dubai, we would like to take this opportunity to express our heartfelt thanks to MGK for their continuous support and maintaining the ROX Electrolyzing Water System Machine for the last 1 year.

We are using the ROX Machine to sanitize our fruit, vegetables, fish and any other products and have implemented this system in our kitchen operation.

We would like to express our satisfaction on this products which is highly effective rather than the traditional cleaning products. The validation has been done by Pillsbury consulting and the result meet the required standard requirements.

I highly recommend this ROX Electrolyzing Water System to any establishment especially in regards to the HACCP standards. Once again thank you for the very appreciative product and services provided.

Regards,

A.Refaie Othman
Executive Chef

Re : Appreciation Letter

We, Manzil Downtown Dubai, are continuously aiming to achieve the highest levels in environmental friendly solutions and want to express our thanks to MGK for their support and effort in implementing the ROX Electrolyzing Water System for our Hotel.

We are more than satisfied with the use of ROX machine for cleaning and sanitizing the food, as well as the kitchen equipment.

We also recommend the chemical-free ROX water to other hotels that are planning on going green.

Kind regards,

Daniel Kingston
Hotel Manager

To Whom It May Concern,

We started using ROX 20 E-water System during the pre-opening stage of the hotel in 2012 and have added an additional unit last year to cover all our operations requirements for safe and high quality fruits and vegetables. We are using this for washing and sanitizing of fruits and vegetables and adequacy is monitored by sending samples to our accredited laboratory on a regular basis. The samples sent in previous months has passed the required analysis only showing that e-water can indeed reduce the microbiological load of a product to a safe level.

We are very satisfied with the performance of the system and have not encountered any major challenges so far.

Use of ROX 20 E-water System is commendable based on our experience for more than 3 years now and we sincerely thank MGK and its team for the continuous support and assistance in ensuring the good working conditions of our units at all times.

Sincerely,

Jason Green
Executive Sous Chef
Culinary Department

Dear Mirco,

Greetings from the JW Marriott Marquis Hotel!

We are writing this letter of appreciation after working 4+ years with you in regards to TempTrak, but recently also with Roxwater.

We appreciate the flexibility and fast response time that your team, from administration to technicians, have whenever we face an issue or when we need additional training.

This was especially crucial with Roxwater and you made it easy for us and our operational teams to switch to something new. Any challenge is taken as an opportunity to showcase the ability to overcome the challenges, which is admirable.

Being such a large operation, we truly appreciate it and want to thank you and your team for the same.

Your support in keeping us "food safe" is appreciated.

Kind regards,

3/15/2016

Aurelia Caccamo

Director of Food Safety & Environmental Services

To Whom May It Concern

Introduction of ROX water as an eco-friendly, cost effective and inherently safe product to us was a pleasant coincidence with the kick start of the mega sustainability drive in our worldwide hotels. We are one of the pilot hotels where this product was launched, tested and verified for the cleaning & disinfection of food contact surfaces.

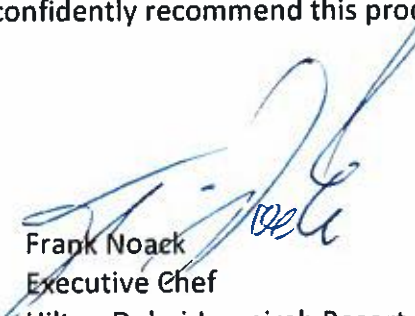

During the approval process, a trial unit was placed in one of our hotels for a period of one month and the results are verified employing an independent municipality approved laboratory known globally for its quality and credibility in food test services.

Results we achieved are amazing in many terms that includes improved efficiency, user-friendliness, saving of storage space, eco-friendliness and absolutely cost efficient. We are quite convinced that this product is unique and obviously the return on investment is guaranteed.

We endorse ROX water disinfection solution and confidently recommend this product to any food business.

To whom it may concern

We started using MGK's ROX Water in 2012 after receiving very positive feedback on its performance from Zuma Restaurant in DIFC, Dubai.

The product fulfilled all our cleaning and sanitization requirements and ensured that we were in compliance with our HACCP Plan. This was independently verified by our food safety experts, Pillsbury Consultants, we are now assured that we are continuously achieving the highest standards of food safety in our business.

We at Roberto's, use Rox Water to sanitise all our raw materials, which include fruit and vegetables, fish, poultry and meat products. It takes care not only of our sanitization requirements but also eliminates unwanted food odours.

Since using Rox Water in our operation, we have noticed that the freshness, quality and the shelf life have all improved. We have found that products which would otherwise spoil quickly are now able to maintain their quality and freshness for approximately 3 additional days.

Rox Water is a product that has all round use, in addition to using it on food products, we are also able to use it to clean and sanitise our food preparation surfaces, storage areas (cold rooms) and structural surfaces, such as walls and floors. We have noted that the level of cleanliness and general hygiene has greatly improved, compared to the cleaning chemicals that we were using before.

We have no hesitation in strongly recommending MGK's ROX Water to anyone in the Food Industry. Furthermore, can confirm our 110 % satisfaction with the ongoing support and immediate response service, that has always been provided by the MGK Service Team.

With Culinary regards,

Luca Signoretti

July 27, 2015

To Whom it may concern,

We have started using the MGK ROX WATER just last year. It was very timely for us as we are on the drive of being ECO FRIENDLY and being one who promotes and supports sustainability projects.

The process was very simple to start as the company lends us the machine for almost two months as a trial basis. In that way, we were able to really study the effect of using the machine versus the current process we have.

The results were very revealing and promising. It is very cost effective and more importantly it is safe. We are very positive about proceeding with the use of MGK ROX WATER for a very long period of time. We are very happy and convinced that this system will grow more in the business as the better option in terms of Sanitation, Health and Safety.

I personally recommend the use of ROX water with high regards on better restaurant operations.

Warm regards,

ANDREW PADERES
